

DEPARTMENTAL PROFILE OF COMMERCE AND MANAGEMENT

1. SCOPE AND IMPORTANCE OF SUBJECT

Economics is the mother of Commerce. Application of Commerce is the father of Science. So Commerce is a “Profit Science”. Commerce education is an integral part of total education system. The term Commerce originally refers to and includes all those activities which create time, place and person utilities for individual and social ends. It is a living discipline and is totally different from other disciplines. Thus Commerce education must prove its relevance by developing efficient persons which in turn calls for drastic improvement in the quality of Commerce Education in India.

In the newly emerging concepts like globalization, privatization and liberalization have opened the doors for the development of Commerce and industry in India. (DEKA and PALIKAR 2004) F.G. NICHOLS has defined Commerce Education as a type of training which while playing its parent in the achievement of the general aim of education on any given level has for its primary objective, the preparation of people for entering upon a business career or having entered upon such career to render more efficient service there in and to advance from their present levels of employment to higher levels. Commerce education is that area of education, which develops the required skills, attitude and knowledge for the successful handling of trade and industry. During the last few years, it has grown remarkably both in corpus and scope. Today it is a growing discipline with a set up many multidimensional areas like accounting, finance, marketing, taxation, statistics, Human Resource Management, material Management and information system.

Our country imparts Commerce Education at three different but mutually inters linked levels- Pre University, under graduate & post graduate, with the objective of providing best

education at all levels. It is noted fact that mankind has prospered and developed year by year, decade by decade and country by country. Along with this, there has been a parallel growth in economic activities. Thus it can be said that the growth in civilization goes hand in hand with growth in trade & commerce. The discipline of commerce imports a unified experience which helps the business world facilitating the supply of required front line personnel.

By considering the above facts the Board of studies in Commerce & Management science of Dr. B.A.M.U. Aurangabad has framed the syllabus of commerce.

2. OBJECTIVES OF DEPARMENT

The main objectives of the syllabus are as follows:-

- 1) To impart and develop knowledge of principles and practice of commerce among the student.
