Dear Colleagues,

It gives us an immense pleasure to invite and welcome you to participate in the One Day Multidisciplinary International e-Conference On “*Changing Perspectives of Education*” organized by Home Science and English Departments of Kalikadevi College Shirur Kasar and KSK College Beed and your esteemed presence is cordially solicited.

Higher education institutions are investing in increasing resources, in order to attain constructive perceptions among their stakeholders. The motive of higher education has been transformed through time in different ways. Higher education is made up of numerous independent and various institutional types that are operating to support and maintain internal organizational self-interest to serve broader societal objectives. Higher education also serves a wide array of students with differing needs, resources and capacities. Problems and opportunities appear quite different from these various perspectives, and actions and interventions can yield different outcomes across different groups of institutions, students or faculty. Today in this digital era higher education institutions (HEI) are continuously striving to develop and deliver impactful educational programs. At the same time, it has become essential that they should continue to fulfill their mission to educate students in basic applied subjects and equip students with new skills. So it is necessary that the subsequent curricular reforms should be transformative in nature, preparing students to tackle the challenges of globalization, unemployment and vanishing professions. Because of transformation in education system during the Pandemic of Covid 19, through this conference we are trying to identify the gaps and highlight the facts about the perceptions of universities and institutions, pinpointing the dimensions that are influencing the education system. We are trying to determine whether the degree of influence differs when considering the perspectives of different stakeholders or individuals from different geographical areas.
