A THREE DAY ONLINE LECTURE SERIES, ORGANIZED BY THE DEPARTMENT OF ZOOLOGY

Sir Ronald Ross

Day:01 (19.08.2022)

World Mosquito Day, observed annually on 20 August, is a commemoration of British doctor Sir Ronald Ross's discovery in 1897 that female anopheline mosquitoes transmit malaria to humans. Prior to the discovery of the transmitting organism, vector, there were few means for controlling the spread of the disease although the discovery of quinine in the treatment had alleviated the problem of treatment.

Glimps of Talk

The resource person Professor Laxmikant Shinde talk on the topic **Mosquito: A Tiny Creature of Deadly Disease** on 19/08/2022. He explained the mosquito species in the world more than 3000 species and their role to spreads mosquito-borne diseases like Malaria which is caused by the transmission of plasmodium into the body by a female Anopheles mosquito. These mosquitoes generally bite at night. Plasmodium is a type of parasitic protozoa. Vivax and Falci-parum are the common species of Plasmodium found in India. Dengue is transmitted to humans by female Aedes mosquitoes. These mosquitoes carry the dengue virus (DEN), which comprises four distinct serotypes (DEN-1, DEN-2, DEN-3, and DEN-4) and belong to the Flaviviridae family. The dengue mosquito commonly bites during the daytime or before dusk. Chikungunya is also transmitted by the same female Aedes mosquitoes that spread dengue. It is caused by the RNA virus that belongs to the alphavirus genus of the Togaviridae family. chikungunya, and Lymphatic filariasis, commonly known as elephantiasis, is a painful and profoundly disfiguring disease. It is caused by infection with parasites classified as nematodes (roundworms) of the family Filariodidea that are transmitted through the bites of infected mosquitos.

He also gives the preventive measures of mosquitos-related diseases that if mosquitos breeding is detected then steps must be taken to eliminate it by covering all water containers emptying and drying water tanks, coolers, bird baths, pet water bowls, and drip trays at least once a week. He has also discussed the economical aspects of mosquitos-related diseases in all over the India and World.

Principial Dr. Vishwas S. Khandare gives the session remarks. Dr. Tanvir Pathan introduce the speaker and Vote of thanks by Dr. Santosh Rankhamb.

In inaugural talk Dr. DayaramMaske says stress management is a need of era. Further he says that while working in a government, semi-government or private sectors, superiors should communicate with employees keeping in mind their emotional, psychological, and social needs. In today's hectic life, from office to home, everyone has to go through stress. If it is not properly managed in time, its effect can be seen in the office as well as at home. So every employee and his superiors are expected to behave harmoniously while dealing with his co-workers so as to create a healthy environment in the office and reduce stress.

In presidential talk, Dr. VinwashKandhare told that every institute is not only office but it is a kind of house where different kinds of people dwell and live. So every superior or head of institution should have work silently. By giving concluding remark Dr. K.H. Waghmare has proposed vote of thanks towards all the MoU Institutions, resource person and participants.
