

STUDENT CENTRIC ACTIVITIES 2019-20

DEPARTMENT OF HOME SCIENCE

GUEST LECTURE ON THE OCCASION OF WORLD YOUTH DAY 12TH AUGUST 2019.

On the occasion of World Youth Day on 12/08/2018 we organized a lecture of Dr. Sita Giri from Raimoha National Rural Health Mission Center for College students. In which 34 students of department were present. Also Principal Dr. P.B. Deshmane, Adolescent Health care program officer Mrs. Shaili Bagate and faculty members of department were presented. Through this program we tried to aware students regarding their health and personal problems.

POSTER PRESENTATION ON 15TH AUGUST 2019-2020

Presented a poster on, 'Dressing Pattern of Different States of India' on behalf of Independence Day on 15/08/2018. For this presentation Principal Dr. P.B. Deshmane Madam, Vice Principal Dr. S.K. Tupe other staff members and five students of department were present.

World Nutrition Week Celebration 01/09 to 07/09/ 2019-2020

On behalf of World Nutrition Week, we organized different adolescent interaction programs with college and school students, Recipe competition and Wallpaper Competition. During these interaction programs we discussed various issues like, Physical Changes during Adolescents, Nutritional Needs of Adolescent and Reproductive Health and Nutrition. For this Interaction Program five or more students use to participate with us during the visits to nearby school, college or our college programs.

In Nutritional rich recipe competition near about 18 students have participated and prepared recipes from milk and milk products.

For wallpaper competition 25 students from junior and senior college had participated and prepared wallpapers on environment and nutritional awareness. These posters were judged and sorted for Ist, IInd and IIIrd price.

Poster Preparation Competition 02/09/2019

Nutritional Rich Recipe Competition 02/09/2019

Organized One Day Educational Tour of Students to Verul Caves on 11/01/2020

As apart of educational tour we had organized one day tour to Verul Caves of Aurangabad. For this tour 25 students of our department were present enthusiastically. Along with Verul Caves we also visited, Daulatabad Fort, Bibi ka Makbara and Eknath Maharaj Temple of Paithan. Our college staff members were also present on this tour.

Exhibition and Food Stall in College Cultural Program, February 2019-2020

Each year our college conducts Annual Cultural Programs in the month of February. This year also we participated in this program and displayed our handicrafts made by students. The guest appreciated it so much. We also inaugurated some posters made by our students on various social topics. In this annual function our students had displayed a stall of various food items and sold it with profit to students, teachers and guests. In this function students of all three years along with alumni students participated enthusiastically.

DEPARTMENT OF ZOOLOGY

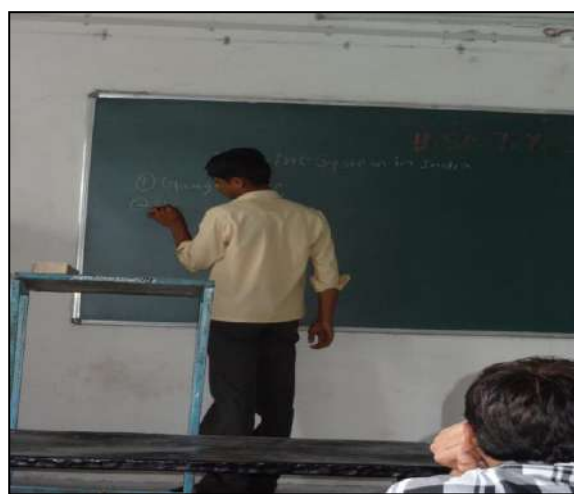

Publication of Wallpaper

The students of zoology department have published wallpaper on 26th January, 2020.

Department of Zoology Students Seminar

Study Tour of Zoology Department

We organized one day study tour of B. Sc. Final year students of Zoology. As a study tour is compulsory to visit a fish farm and study parameters like physical and chemical factors etc. on 05 January 2020, we visited fish farm that was known by the name “Maharashtra Fish Seed Production Center” Kesapuri Camp, Majalgaon Dist. Beed.

The aim of this farm is to production of seeds and supplies various farmers. Near about 6 hectares area of this farm. The soil is clay which is better water retention capacity. Various types of ponds are constructed by digging the land. Pond consists, of stocking rearing, breeding and nursery ponds for various purposes.

There are 6 types of fish species were cultured namely Indian major carps i.e. *catla catla*, *Labeo rohita*, *Cirrhinus mrigala*, Silver carp - *Hypophthalmichthys molitrix*, grass carp - *Ctenopharyngodon idella* and common carps – *Cyprinus carpio*. They are developed in the pond water, but did not breed in captivity. Naturally they breed in riverine conditions at the time of breeding season. When fish seed collected from such forces there is mixture of various fish seed desirable and undesirable species.

For obtaining pure fish seed or such species is very difficult to farmers for solving this problem this fish farm owner developed a special type of induced breeding technique, breeding devices consist of Chinese breeding pond, Bangla bundh, incubation tank, seed collection chamber, overhead tank.

Indian major carps and Chinese carps breed during the monsoon months i. e. June to August. The common carp breed twice a year in the months of June and December. For breeding of Indian major carps and Chinese carps, the male and female infected with ovaprim (containing Gn RHA dopamine antagonist dompendone). Dose is varying from species to species and sex to sex. Injected brooder

released into breeding tank. After 6 to 8 hours of injection they breed. Fertilization external, fertilized eggs collected into incubation tanks. These spawns transferred into hapa kept remain there for 3 days, then transferred into nursery ponds. After 15 days rearing ponds or transport to fish farmer.

Common carp - *Cyprinus carpio* breed in breeding hapa which is arranged in pond, they don't need any inducement.

For fish seed transportation, there is oxygen cylinder carton box, polythene bags etc. this whole transportation system is seen by our students practically. For fish seed transportation first fish seed are collected and stored in small hapa or cement cistern. Then supply to the polythene bag containing water this bag also filled with oxygen, and then packed the mouth of bag. This bag is kept in a cartoon. This is ready for transportation. This seed is transported various places.

For food purposes, the spawn and fry, the nursery pond is well prepared by manuring, developing planktons, zooplanktons and phytoplankton. For larger fishes used cow dung and rice.

For manuring of ponds used organic fertilizers like cow dung, lime is also used to kill the parasites as well as to correct the pH of water and soil.

All our students observed all the techniques practically on the field. This is definitely very beneficial to our students. They can also develop the fish farm after completion of their degree. They can own develop their employment and also give employment to the other persons also. On the whole day we are on the farm and observed various techniques and then return back in the evening.

For the success of this tour, efforts have been taken by all teaching and non- teaching staff. The following staff members were present.

Dr. Pathan T.S. – Head of Department

Shri. Shinde H – Lab attendant
